

## Test for Location GetCity(), GetCountry()

```
Weather.java Request.java TestRequest.java TestWeather.java Location.java TestLocation.java
1 package avenger.weather.weatherRequested;
2
3
4 public class TestLocation {
5
6
7     public static void main(String[] args) {
8         Location location=new Location("Cork");
9         System.out.println("City: "+location.getCity());
10        System.out.println("Country: "+location.getCountry());
11    }
12
13
14
15 }
16
```

## Output

```
